Genomic Medicine:
Through rose colored glasses but wearing green eyeshades

Robert Nussbaum, MD

Monday, April 18, 2016
1:30 pm
Duke North 2001
Duke Hospital

Robert Nussbaum has served as Invitae’s Chief Medical Officer since August 2015. Invitae is a genetic information company whose mission is to bring genetic information into mainstream medical practice to improve the quality of healthcare for billions of people. Prior to joining Invitae, Dr. Nussbaum was chief of the Division of Genomic Medicine at UCSF Health where he also held leadership roles in the Cancer Genetics and Prevention Program beginning in January 2009 and the Program in Cardiovascular Genetics beginning in July 2007. From April 2006 to August 2015, he served as a member of the UCSF Institute for Human Genetics. Prior to joining UCSF Health, Dr. Nussbaum was chief of the Genetic Disease Research Branch of the National Human Genome Research Institute, one of the National Institutes of Health, from 1994 to 2006. He is a member of the Institute of Medicine and a fellow at the American Academy of Arts and Sciences.

The Task Force for Neonatal Genomics applies genome sequencing and analysis to the diagnosis and clinical management of children with developmental and congenital anatomical defects. Our mission is to determine under what parameters genome sequencing can be implemented as a tool to inform and guide patient management in a scientifically robust and ethically responsible fashion.
